

Food Security and Trade in a Period of Change and Innovation

On the one hand, global trade with agricultural and food products offers a huge potential for contributing to food security, for example by enabling the provision of diverse food sources. On the other hand, trade may also jeopardize local and regional agricultural markets and producers, especially in developing countries. Further, the carbon footprint of food products and, thus, the impact on climate change, but also food scandals have increased the awareness to focus again more on local and regional products. This might be true for developed countries, but how can local / regional trade in developing countries become strengthened? Can the complexity of trade, climate change and food security become a sustainable system?

Venue

University of Hohenheim
Castle, Balcony Hall
Schloss Hohenheim 1
70599 Stuttgart

Directions

Public transportation from Stuttgart main station:

1. Railway:

Underground U7 / U15 until "Ruhbank (Fernsehturm)" then

2. Bus:

Bus 70 ("Plieningen Seemühlengeweg") until "Universität Hohenheim". Cross the street and continue straight to the main castle building.
